MORGAN STATE UNIVERSITY NATIONAL CENTER
FOR TRANSPORTATION MANAGEMENT, RESEARCH & DEVELOPMENT

DIRECTORY OF KEY PERSONNEL

as of December 1, 2010

This directory includes contact information for the staff, advisory committee, researchers, and organizations affiliated with the National Transportation Center at Morgan State University.

Located in Baltimore, Md., Morgan State University is a doctorate-granting and research-intensive public urban university.

The National Transportation Center (NTC) at Morgan State University is committed to transportation research and education that support the well-being and economic development of communities.

Theme

The NTC's theme is "Transportation: A Key to Human and Economic Development." The center's research examines how multi-modal surface transportation systems affect people, particularly in terms of socioeconomics, equity, efficiency, technology, the environment, and safety. As a complement to this theme, the center aims to increase the numbers of minorities and women in transportation careers.

History

The NTC is officially known as the Morgan State University National Center for Transportation Management, Research and Development. The center is part of the U.S. Department of Transportation's University Transportation Centers (UTC) Program. The NTC is also a member of the Council of University Transportation Centers.

The NTC was established by Congress under the Intermodal Surface Transportation Efficiency Act of 1991; reauthorized in 1998 by the Transportation Equity Act for the 21st Century; and reauthorized again in 2005 by the Safe, Accountable, Flexible, Efficient Transportation Equity Act—a Legacy for Users.

CONTRIBUTING FACULTY RESEARCHERS

Dr. Mansoureh Jeihani's project *Effectiveness of Dynamic Speed Display Signs* investigates whether the signs slow drivers. In October, Dr. Jeihani and her research assistant installed tubes and counting devices on Perring Parkway (between Echodale Avenue and Northern Parkway) to track the speed of cars approaching and passing the devices.
