

**FALL 2010**  
**Technology Policy Reminders**  
**to Improve and Protect**  
**Student Computing**

---

**Morgan State University Technology Policy Overview**

**Keep the Morgan Network Fast and Safe.** Network use is continuously monitored. Excessive use of bandwidth or other activities that threaten the network will result in automatic disconnection of computers that are causing the problem.

**Use Technology Resources Legally.** Illegal downloads of music, videos, or other copyrighted material may be subject to external legal action against you. Owners of copyrighted material have a reputation for prosecuting offenders and having large fines levied against students.

**The Morgan Network is for Authorized Users Only.** Each user needs a unique, Morgan user ID and password. Wireless networks that are not operated by the University are strictly prohibited by the State of Maryland and the University's standard security practice.

*Violators of this policy are subject to having their network privileges revoked. Repeat violators will be referred to the Morgan State University Office of Judicial Affairs and could face permanent revocation of network privileges as well as other sanctions.*

---

**Use CLEAN ACCESS to Keep Your Computer Free of Viruses**  
**Coming to the Residence Halls Soon**

Students accessing the Morgan network from personally-owned computers in the near future will be required to install Clean Access on their machines.

Information concerning installation will be made available via students' Morgan email and in residence halls.
