ON MY HONOR

The news of the

Intellectual incubator of

Morgan State University

NON MEDIOCRIS ERIT MAGNUS

Advice to college freshmen is hard to give and even harder to receive. A recent article I read about The College Freshman’s Don’t Book, published in 1910, discussed some very interesting points about Don’t’s or rules for college freshmen during that time period. Much of the advice is grounded in a particular time. The author assumes that all college students are men and primarily from an upper class background. The section on residence gives tips on interacting with the landlady, warns against buying roll-top desks, iron safes or fine china during their first term, and offers caution in selecting Turkish rugs. In terms of dress, whiskers, moustaches, long hair, canes and top hats are out. Stickpins with horse heads are seen as too ostentatious in implying that one keeps horses. In social relations, students are advised not to shake hands like a clam or flippers, not to try and pick up everyone in a bonnet and high heels, and to avoid strutting and looking patronizing, especially around seniors and proctors.

Some of the messages are adaptable to today’s time and place: Don’t think that crazy or odd clothes are necessarily “College” clothes. Lots of college men do wear crazy clothes; but it isn’t so much because they’re College men, as because they’re crazy. (p. 13) Don’t expect the College Town to furnish you with good weather; because it won’t. The weather is generally the only thing about a College Town not yet educated. (p. 1) Don’t begin by resorting to the Quick Lunch. Nobody ever made friends at a Quick Lunch, except with the waitresses. (p. 15) The academic advice rings true 100 years later and mirrors what I would suggest:
• Don’t forget to attend a large percentage of your lectures.
• Don’t think that exams can be passed without any preparation.
• Don’t put off that long piece of written work until the night before it is due.
• Don’t neglect any honest opportunities you may have to make friends with an Instructor or a Professor.

Your college experience is an exciting journey. You will find many activities and opportunities of interest, from making friends, to research experiences, to clubs and community service. I predict that your interests will exceed the time available so you will need to choose where you invest your time and energy. Remember that you don’t have to do everything at once! Don’t be surprised or disappointed, if you find you have neither time nor inclination to keep up with everything you thought you would, when first coming to College. Your interests naturally need to be sorted-out. (p. 26-27).

We in the Honors College look forward to learning about your journey, the challenges you face and the accomplishments you achieve.

ON MY HONOR

HONORS COLLEGE STUDENT FEATURE

My name is Kevin Little; I am a graduating Electrical Engineering major at Morgan State University. I have been apart of the University’s Honors College since 2012.

During my matriculation at Morgan, I have maintained a 3.601 GPA never failing a class and only receiving one C in my signals and systems engineering course. I have been a member of the Marching Band since 2012, where I play Sousaphone. I try to stay active in the community and give back as much as possible, for this is impactive in our world today. I mentor inner-city youth in the Verizon Minority Male Maker Program, which exposes inner-city underprivileged youth to STEM related subjects and ideas.

During the summer of 2016, I was fortunate enough to intern with banking superpower JP Morgan-Chase. I gained valuable experiences within banking technology and how a big-bank employs engineers to keep critical banking applications working. Due to my education here at Morgan and my strong work ethic during my summer-internship program, I was offered a full-time position after graduation.

Upon my graduation in December 2016, I will be starting my new assignment in February 2017. I will be relocating to Delaware to take this assignment as a Technology Analyst. I’m very excited to be embarking upon this journey because I have been so dedicated to my studies and everything is about to pay off!!

THE HONORS COLLEGE WELCOME BACK COOKOUT

In an attempt to build a sense of community within the Honors College we have planned a series of social events. Our first social event was a cookout and it was well received!

During our festive event we were honored with a surprised visit from the Honors College first lady Dr. Clara I. Adams. The Honors College bears the name of Dr. Adams and we are always honored to have her in our presence. We would like to thank those who attended and hope you will see fit to attend other social events we have planned this year.

Our next social event will be a Politics Night on October 27, 206 from 6:00pm – 9:00pm in Jenkins Hall. (More Information to come)

Photo credit: Charles A. Smith/Jackson State University

Welcome to Dean Yu from the Honors College!

Allison Murdock
Honors College Staff Writer

The Clara I. Adams Honors College welcomes Dr. Hongtao Yu, Morgan’s newest Dean and Professor here at Morgan State University. Morgan State University President David Wilson appointed Dr. Yu as the Dean of the School of Computer, Mathematical & Natural Sciences (SCMNS). Dr. Yu succeeds Dr. Alvin Kennedy who served as interim dean for two years.

Dr. Yu transitioned to Morgan from Jackson State University in Jackson, Mississippi and comes to Morgan as a well-prepared asset to the Morgan community and as an influential leader in a STEM-based school. Jackson State University’s former faculty member and chairperson led his Department of Chemistry and Biochemistry in the College of Science, Engineering, and Technology to earn a distinguished ranking among the top 50 chemistry departments in the nation, an achievement never received by any HBCU in the country. (Dr. Yu continued on page 3)
ON MY HONOR

(Dr. Yu continued from page 2)

According to news.morgan.edu, President Wilson boasted about Dr. Yu saying, “We are excited to have attracted someone of Dr. Yu’s caliber to lead our science programs... Our vision is to become the top research HBCU in the country over the next five-to-ten years. With the recent appointment of Dr. Michael Spencer for engineering and now Dr. Yu for the sciences, I believe we are closer to that goal. In fact, I plan to make the case to the state legislature for a $1.25 million appropriation to construct at Morgan a new, world-class, state of the art science and innovation complex.” Dr. Wilson hopes to have an impactful influence on the production of minorities in STEM-based careers.

SCMNS is honored to welcome such a decorated Dean. Dr. Yu has earned numerous awards and honors including the National ChemLuminary Award for “Best Activity with Underrepresented Minority Students and/or Organizations” from the American Chemical Society, Morgan State University and the Clara L. Adams Honors College look forward to Dr. Yu’s impact at the University and anticipate great success in the SCMNS. Freshman computer science major and honor student, Dianna Burrell, said, “with Dr. Yu as our new Dean, I’m excited to see all the improvements and changes he has in store for SCMNS.”

Dr. Yu’s office is located in the Dixon Science Research Center, Ste. 200, students are encouraged to welcome Dr. Yu. He can be contacted by email at hongtao.yu@morgan.edu or (443) 885-4515. On behalf of the Clara L. Adams Honors College, we would like to extend a special welcome to Dr. Yu.

SCMNS offers eight undergraduate programs, five undergraduate programs, and four research programs. There are also three research centers and student support programs. The school offers professional programs that adequately prepare its students for careers in science research and medical-related fields.

HONORS COLLEGE STUDENT FEATURE

This summer, Ms. India Harper, an honors student and a psychology major at Morgan State University was accepted to the National Institute on Drug Abuse (NIDA) eight-week summer internship at the University of California, Los Angeles (UCLA) in the Department of Family Medicine. Along with this internship, Dr. Steven Shoptaw, a licensed psychologist and UCLA professor, mentored me. I was tasked with two projects one was an ongoing paper, which will be published, with my mentor (Dr. Shoptaw) as well as a research project and literature review on the “Cost Effectiveness of Injectable Naltrexone for Treating Alcohol Use Disorder”. I was fortunate enough to give an oral presentation at Charles Drew University 11th Annual Drug Abuse Research Symposium. I was the only undergraduate student to give an oral presentation and was acknowledged with an award for the “Top Student Trainee Oral Presentation.” At this symposium I presented my research findings from my summer projects and had the honor to dine with former U.S. Surgeon General David Satcher, M.D., Ph.D., who was the main speaker at the Symposium. Click the link below to read more about the symposium: Click to read coverage of the DIDARP Conference.

Message from Dr. Peterkin

Dear Honors Students,

It is hard to believe that we are already halfway through the Fall 2016 semester! By now, you have settled into the rhythm of your classes and the larger cycle of life at the University. Undoubtedly, you have made new friends and encountered new challenges and opportunities as the academic year continues to unfold. As demonstrated by much of what you will read in this issue of On My Honor, in the Honors College we have certainly had an exciting few weeks. Beginning with a Welcome Back Cookout during the first week of classes in August, Honors has hosted and/or co-sponsored a veritable smorgasbord of programs designed to nourish the intellect and give our students a coveted leg-up in admission to graduate and professional school or entrance into the workforce. Attendance at these events has been the strongest that I have seen in recent years. I was particularly pleased by the amazing turnout for the presentation by Dr. Roland Rich, the first Keynote Speaker in our 2016-2017 United Nations Lecture Series, on Thursday, 29 September 2016. Your attendance at and active participation in Honors College programs is not just gratifying to our guests and the Honors staff - it also helps us to determine where we should direct our precious resources in our relentless effort to enhance your Honors experience at Morgan. If you have liked what you have seen thus far, you will absolutely love what we have planned for the second half of the semester. As I write these words, I know that you are preparing for your midterm examinations. For some of you, this will be the first real test of your knowledge and abilities as a college student. For the rest of you, the sensation will be familiar, even if the subject matter itself is different. For all of you, midterms should represent an opportunity to take stock and, if necessary, make the changes that will ensure your success in the academic enterprise. Whatever happens during midterms, remember that we in the Honors College believe in you and stand ready to assist you in any way that we can. While I am, of course, tempted to wish you good luck in the week ahead, I shall leave you instead with a wonderful poem by Emily Dickinson:

Luck is not chance--
It’s toil--
Fortune’s expensive smile
Is earned.

Best Regards,
Darryl L. Peterkin, Ph.D.
THE HONORS COLLEGE UNITED NATIONS
LECTURE SERIES
AMABASSADOR ROLAND RICH OF AUSTRALIA

Chloe' Colbert
Honors College Staff Writer

Doctor Roland Rich, a former United Nations ambassador and current professor of political science at Rutgers University-School of Arts and Sciences, spoke at the inaugural United Nations Lecture for 2016-2017 on Thursday, September 29, 2016. Dr. Rich spoke about the three theories on the process of democratization in countries and of his work with the United Nations Fund.

The first method of democratization is through political parties. Rich said that as political parties, in this theory, lead to a democratic government. This was the case in American history. “Political parties are certainly not what they used to be,” Rich said. He explained that the political parties that led to democratization were much smaller and less powerful than those in today’s world. He then touched on the domino or modernization theory, a theory that he says “turns Marxism on its head.” Rich said that in the domino theory, growing the middle class is what leads to democratization. Rich also pointed out the flaws with this theory, saying there are rich countries like Singapore that are not democracies and poor countries like India that are “too diverse that only democracy could work.”

Rich said that the biggest example of this theory would be China. He said that if democratization could evolve in China out of their large middle class then the theory would gain more credibility.

Rich then went on to the final theory of democratization: civil society. Rich described civil society as the organized sector of public life between the state and the family. “The realm of government is the problem in the global North... the realm of family is the problem in the global south,” Rich said, explaining the importance of civil society being a middle ground. He said that civil society is considered “big bang democratization” that reforms a whole society at once. Rich gave examples of Poland, in which civil society worked to create a democracy and Russia, in which it failed.

Students were also able to ask Dr. Rich questions and challenge his theory of democratization. There were over 150 students in attendance for this inaugural Fall 2016 event and a few lucky students had an opportunity to have lunch with Dr. Rich and other Morgan professors and administrators.

Dear Honor Students:

Honors students are required to attend designated Honors events or University seminars, colloquia, and convocations. To track your attendance of these events we will be implementing a new attendance system. We have developed a QR Code for all required Honors events and University related seminars, colloquia, and convocations. The QR Code for each event will be posted visibly somewhere in the location where the event is being held. We will notify you of where the QR code is located. However, it will be your responsibility to locate the QR Code and sign in.

Dear Honors Students:

The Honors College is sponsoring the Lenovo visit to campus. Please read all of the details below and act accordingly. This is a great opportunity for our honors students that are interested in the tech world. If you are engineering, computer science, information systems, or business major no matter what year Lenovo wants to meet you! Are you interested in working for a top tech company? Lenovo is a top global technology company (the #1 PC-maker in the world) headquartered in Raleigh, NC. Lenovo will be visiting our campus for two days this month on October 18th and October 19th for the Career Fair. The Honors College will be sponsoring: Lenovo Talks: A Conversation with Lenovo Employees - October 18th - 4:00 - 6:00 pm. Join Lenovo recruiters and engineers for Lenovo Talks. Engineering and business students are highly encouraged to attend this event. One of Lenovo’s top female engineer will be leading a conversation titled “Why Not Me: Understanding Your Worth as a Minority in Tech.” We’ll also be sharing information about internship and full-time opportunities and will give away one of our latest tablets and apparel. The location of this event is Earl Graves School of Business, Room 309. To get a count for food, we’re asking that students RSVP at the following link, please submit a resume when RSVP'ing - http://tinyurl.com/hizqekr. October 18th - 11:00 - 2:00 pm - We’ll have a table in the University Student Center. Come meet our team, learn about internship and full-time opportunities, and win some cool prizes! October 19th - 10:00 - 3:00 pm - Career Fair - Hill Field House Arena - Upload your resume ahead of the event at http://tinyurl.com/hg2pms. We’ll be giving away another tablet during the fair, as well!
Dear Honors Students:

Sometimes our job takes us away from the office for meetings and other tasks, so that we can better serve you we have developed a student assistance form that you may fill-out in our absence and place under the door. The student assistance forms are colored and located on the wall to the right of the door. Here is an example of what the form looks like:

North Carolina Central University
School of Law

Admissions officers from North Carolina Central University School of Law will present an informational session about law school preparation, admissions, student life, and programming at UNCC.

**When? Thursday, October 11, 11 AM**

**Where? Holmes Hall 117**

For more information, contact Seth Vanatta at seth.vannatta@morgan.edu
Dear Juniors Honors Students:

The Consumer Product Division of McCormick Corporation in partnership with the Earl Graves School of Business and The Honors College is sponsoring a career visitation day for Juniors with a GPA of 3.0 or higher majoring in the following disciplines:

Business management/administration/analytics
Supply Chain Management
Communications
Culinary Science
Information Technology
Computer Science
Chemistry
Biology
Nutrition Science (or other central or life science)
Marketing
Finance
Accounting
Engineering (Chemical, mechanical, electrical)

The visitation day will be Monday October 24, 2016 from 5:00pm - 7:00pm at the Hunt Valley location of McCormick. The Honors College will provide transportation. If you would like to go please send Mr. Smith an email: with your full name - major and GPA. This event is only for juniors with the above majors and GPA.

The Honors College will provide transportation to and from this event.

If you are planning on attending please make sure to have your resume prepared and dress professional. If you need to run off copies of your resume please come the Honors College office.

---

Dear Juniors and (Graduating Seniors-December 2016 or May 2017):

The Honors College has established a partnership with Morgan Stanley's Baltimore office to provide internship and employment opportunities for honors students that are interested in financial services.

This specific opportunity is for all majors, however, you must currently be a junior or graduating senior with a 3.0 or higher GPA.

1. **Operations Analyst Full-time Program:** This program is for graduating seniors only (December 2016 or May 2017) and is a full-time training program - you must apply on both sites eBear and morganstanley.com/campus prior to October 30, 2016 to be considered.

2. **Operations Summer Analyst (Intern) Program:** This program is for juniors only and is a summer 2017 training program - you must apply on both sites eBear and morganstanley.com/campus prior to October 30, 2016 to be considered.

On October 27, 2016 at 11:00 - 12:45 pm The Honors College will be hosting employees from Morgan Stanley for a lecture on *What will you create?* The lecture will take place at the Earl Graves School of Business Room 307. Please attend this lecture because you will learn additional information about these two opportunities and also be able to network with Morgan Stanley employees that will be making a decision on your application for these opportunities.

---

Dear Sophomores and Juniors:

The Honors College has developed a partnership with Morgan Stanley's-Baltimore Office and they will be hosting a workshop for our students at their headquarters here in Baltimore on Thames Street. The Morgan Stanley Early Insights Program is an opportunity for those sophomores and juniors that are interested in the financial services industry to learn about Morgan Stanley. The Honors College will provide transportation to and from Morgan Stanley for those sophomores and juniors that decide to attend the workshop. The workshop will be held on December 2, 2016 - 9:30 am - 2:30 pm. If you attend the workshop the Honors College will provide an excuse for you from class.

In order to attend the event you must apply online by: Tuesday, November 15, 2016

To apply, please visit [www.morganstanley.com/campus](http://www.morganstanley.com/campus)

Once you apply online for this workshop Morgan Stanley will evaluate your application and send you an invitation to attend. I highly recommend this to the juniors that are planning to apply for the Summer Operations Analyst Internship position at Morgan Stanley.
ATTENTION STUDENTS!

Have you thought about the what, why, and when: when it comes to law school?

ACADEMIC OPPORTUNITIES

The UCLA Summer Programs for Undergraduate Research (SPUR): The UCLA Summer Programs for Undergraduate Research (SPUR) offer upper division undergraduate students with outstanding academic potential the opportunity to work closely with faculty mentors on research projects. The programs are designed for students who wish to learn more about the graduate school experience and possibly pursue an academic career in teaching and research. Opportunities are available in virtually all-academic fields (e.g., arts, humanities, social sciences, life sciences, health sciences, physical sciences, etc.). Each student participant will be working with a faculty mentor with special expertise and interests matched, as closely as possible, to the student’s research interests and career goals. Students will either assist the faculty member in an ongoing research project or work collaboratively with the mentor in designing a new project of mutual interest. For further details about specific programs, please refer to the link below: https://grad.ucla.edu/admissions/diversity/summer-programs-for-undergraduate-research-spur/viewbook/

The USC Sol Price School of Public Policy-Summer Pre-doctoral Workshop for Students of Color: Our world is changing, and public policy and urban planning can lead the way. In an increasingly diverse and globalized world, planners and policy makers work to create communities that are economically thriving, socially just, and environmentally sustainable. A doctoral degree can prepare you to link new knowledge to issues that affect communities and policy-making worldwide. To introduce Ph.D. study to selected outstanding students, the USC Sol Price School of Public Policy, in partnership with the Association of Collegiate Schools of Planning, will host a three-day workshop to prepare students to apply to and succeed in doctoral programs. Students from groups that are underrepresented on public policy and planning faculties are particularly encouraged to apply. Workshop events will be held on the USC campus, in the heart of Los Angeles, July 17-20, 2016. Registration and instructional materials will be provided at no cost, lodging and meals will also be provided at no cost, and travel stipends are available for students coming from outside of California: https://priceschool.usc.edu/predoctoralworkshop/

Charles Hamilton Houston Law School Preparatory Institute: This seven-week summer program held at Georgetown University Law Center aims to prepare students of color with the skills necessary to succeed in law school. The curriculum introduces students to American jurisprudence, federal and state court systems, critical legal vocabulary, the civil litigation process, and case analysis methods. Students gain a preliminary understanding of Legal Research & Writing and are taught by notable attorneys and leaders in the legal field: http://www.chhprelawinstitute.org/about.html

Florida State College of Law Summer for Undergraduates Program: The Summer for Undergraduates Program brings to campus undergraduate students from throughout the country for a month-long immersion into legal study. The largest and oldest of its kind, the primary goal of the program is to acquaint students with the study of law and to assist them in acquiring skills that will benefit their undergraduate and future law school studies: http://www.law.fsu.edu/academics/summer-for-undergraduates

Cornell University LSAMP Summer Research Experience for Undergraduates: CU LSAMP REU is a summer research opportunity that provides undergraduate participants with the opportunity to work with distinguished faculty and staff as well as network with others in their field of interest through weekly luncheons. Undergraduate students, interested in gaining a deeper understanding in an engineering-related field, have the opportunity to conduct and present research over a ten-week duration under the auspices of a Cornell Engineering faculty research mentor. Through this one-on-one partnership, participants will gain theoretical knowledge and practical training in academic research and scientific experimentation. CU LSAMP REU was developed to aid in the retention of traditionally underrepresented minority groups in STEM: http://eulsampreu.weebly.com/

Summer Research - Early Identification Program (SR-EIP): Since 1992, the Leadership Alliance has encouraged students from groups traditionally underrepresented in the sciences, engineering, social sciences and humanities to pursue research careers in the academic, public and private sectors. SR-EIP provides undergraduates with training and mentoring in the principles underlying the conduct of research and prepares them to pursue competitive applications to graduate schools. SR-EIP is a gateway to ongoing resources, mentoring and professional networks to support all participants along their chosen career path. SR-EIP is a rigorous research experience designed specifically for undergraduates interested in applying to PhD or MD-PhD programs: http://www.theleadershipalliance.org/tabid/242/default.aspx

The Columbia Business School, Columbia University's School of Professional Studies-Business Edge: In partnership with the Columbia Business School, Columbia University’s School of Professional Studies offers an intensive six-week summer program. Business Edge gives advanced undergraduates and recent liberal arts graduates the opportunity to acquire a world-class business education in the following core competencies: Accounting - Leadership and Strategy - Marketing - Finance - The integrated curriculum, taught by Columbia Business School faculty, incorporates project-based study, as well as career-oriented workshops and guest lectures. A case study final project applies the knowledge and skills accrued in each of the course modules of the program. Upon successful completion of the program, students will receive an official Columbia University Statement of Attendance and will be better prepared to pursue an entrepreneurial path or an MBA. They will be able to analyze and interpret financial statements, understand the fundamentals of finance, develop innovative promotional strategies, and learn how to apply the core concepts of management and organizational theory in the workplace: http://spscolumbia.edu/summer/business-edge
2016 HISPANIC/LATINO
HERITAGE CELEBRATION

Hosted by the
Department of World Languages & International Studies

Wednesday, October 19th

9:30 AM
Welcome & Opening Remarks: Dr. M. N'gom, Interim Dean of the College of Liberal Arts and Dr. Helen Harrison, Interim Chair of World Languages & International Studies

9:45 AM
Performance by MSU Choir Members

10:00 AM – 11:50 AM
Latino Immigration in Film: Viewing and Discussion of ‘A Better Life’

12:00 PM – 1:00 PM
What Is Diversity Anyway? Gender and Ethnicity in U.S. Borderlands: Dr. Elizabeth Gunn, Associate Professor of World Languages & International Studies

5:00 PM – 6:30 PM
Latino Muslims in America: A Historical, Demographic & Ethnographic Introduction: Dr. Harold Morales, Assistant Professor of Religious Studies

Thursday, October 20th

11:00 AM – 12:30 PM
Fiestas Patrias Abroad: Cultural Representations of Peruvianess in the US and Brazil: Dr. Camila Daniel, Professor at the Federal Rural University of Rio de Janeiro

Friday, October 21st

10:00 AM – 11:30 AM
The Latino Community & the 2016 Presidential Election: CASA Maryland and Community Members

11:45 AM
Closing Remarks: Dr. José Lara, Assistant Professor of World Languages & International Studies

** All Events held at the Earl S. Richardson Library (Blount Room #120-C)**
