Questions the Self-Study Seeks to Address

Given Morgan’s growth and accomplishments since the 2008 MSCHE team visit and Morgan’s new legislative designation (SB 1085) as Maryland’s preeminent public urban research university, the Self-Study is intended to answer questions concerning the following trends.
Subcommittee I: Mission and Goals

Communication and Dissemination

A. Is Morgan’s administration currently communicating the University’s mission, vision, core values, policies, procedures and traditions to its faculty, staff, students and alumni in an efficient and effective manner?
Tends and Designs Questions

Subcommittee II: Ethics and Integrity

Policies and Procedures

A. What existing institutional policies, procedures, traditions and structures need to be amended, strengthened, or removed to insure that Morgan remains true to its current mission and vision statements?

Subcommittee III: Design and Delivery of the Student Learning Experience

Past Accomplishments and Future Direction

B. How might these accomplishments or areas of growth inform the development of new instructional delivery programs, such as online degrees or certificate programs?
Trends and Design Questions

Subcommittee IV: Support of the Student Experience

Student Diversity and Development

A. In the face of an increasingly more diverse student body, how can the University best match student support services to students’ emotional, social, developmental and physical needs?

Communication and Dissemination

B. What are the most effective and efficient means of disseminating timely information to the campus community, the public, stakeholders and other constituents?

Subcommittee V: Educational Effectiveness Assessment

Student Diversity and Development

B. Also, how can the University insure the quality of student learning outcomes for all students?

C. Should the University consider the creation of branch campuses and/or the creation of new instructional sites?
Trends and Design Questions

Subcommittee VI: Planning, Resources, and Institutional Improvement

Past Accomplishments and Future Direction

A. What have been Morgan’s major accomplishments and/or areas of growth in the last ten years?

Subcommittee VII: Governance, Leadership and Administration

Policies and Procedures

B. What new policies and procedures need to be established to insure that Morgan remains true to its current mission and vision statements?
Eleven Recommendations

1. Morgan should engage the University community and stakeholders in a comprehensive review of Growing the Future, Leading the World: The Strategic Plan for Morgan State University (2011 - 2021) including an analysis of institutional strengths and opportunities as well as an assessment of the Strategic Plan’s current goals and Initiatives in order to identify the changes necessary to fulfill its new legislative designation as Maryland’s preeminent public, urban research university.
Enrollment and Student Success

2. In order to realize its legislative designation as a preeminent public urban university, Morgan should devise and implement plans to: increase enrollment to 12,000 students; invest in diversity by developing targeted market strategies to effectively recruit a diverse demographic, geographic, and economic student body; and, identify an appropriately sited and properly resourced branch campus within Maryland to further advance both imperatives of increased enrollment and an enhanced presence throughout the State.

3. The Division of International Affairs should convene a task force to engage in a comprehensive review of institutional policies, procedures, traditions and structures that impact: recruitment, admission, enrollment and funding of international students; recruitment, selection, and funding of native Morgan students for study abroad opportunities; and, recruitment, hiring, and support for international faculty; and to create a strategic plan that establishes recruitment goals and initiatives to expand the pool of international students enrolled at Morgan.
Academic Excellence

4. Morgan should expand the University’s initial investment in online degree, certificate, and course programming beyond current staffing, SARA membership, and Title III funding and establish a comprehensive plan to secure a budget consisting of more institutional funds to support the design and delivery of online degree and certificate programs as well as to provide urgently needed services that enhance the overall online student learning experience.

5. Current and future global challenges must be tackled from an inter and multidisciplinary approach in diverse learning environments. The Division of Academic Affairs must foster inter-faculty collaboration to advance innovations in scholarship, creative activity, and in teaching and learning. A detailed plan should be developed to specifically identify and develop clusters of intersecting high demand programs which will address issues impacting urban environments, contribute to future workforce needs, and foster academic preeminence.
Institutional Integrity

6. Consistent with Morgan’s ethical responsibility and its commitment to the integrity of its vision, mission, and core values, the University should develop enhanced policies and procedures for identifying and sanctioning instances of violation of Morgan’s ethical standards and for identifying and sanctioning violations by faculty as well as students of the University’s academic dishonesty policies.

7. To align a diverse 21st century student body with University student services, Morgan should convene a task force to comprehensively review institutional policies, procedures, information dissemination (e.g., print and electronic including social media), traditions and structures that impact student support services (e.g., financial aid, academic advising, tutoring, food services, and writing support), and how best to deliver such support services to specific uniquely diverse student populations including veterans, athletes, students taking courses online, students with disabilities, students enrolled in courses offered at off-site, educational centers and international students.
Institutional Assessment

8. The University should develop a formal comprehensive evaluation process for assessing the implementation and impact of mission and goals including assessing feedback from external stakeholders and community partners to guide continuous feedback on attainment of mission and goals.

9. Morgan should establish a centralized and accessible infrastructure for all data generated from academic program level and administrative level assessments conducted at Morgan in order to better facilitate the dissemination of the data to the appropriate constituents. The centralized assessment infrastructure should serve as the reservoir for “big institutional data” from which trends, patterns, and connections can be analyzed to better support continuous institutional renewal.
Graduate Studies and Research

10. Morgan should convene a task force to undertake an intensive review to: identify, strengthen, and expand the existing resources and infrastructure of the School of Graduate Studies in support of a multi-level approach to assessing and monitoring graduate student learning outcomes and enhancing student success; establish a sustained and comprehensive focus on student, faculty, and program development; and align financial, academic, and staffing resources to strengthen existing programs and launch new innovative research and programmatic initiatives consistent with new legislative designation.

11. Morgan should review the organizational structure and inventory of operational responsibilities of the D-RED in order to: (1) provide more tangible incentives for faculty engaged in sponsored research who develop patents and/or opportunities for technology transfer, and/or who secure externally funded grants and contracts; and (2) more closely align D-RED policies, procedures, and operations with faculty and undergraduate as well as graduate students engaged in research throughout the University in order to strengthen the assessment of research and development outcomes and to enhance Morgan’s status as Maryland’s preeminent public urban research university.
