

PROTECT THE CAVE

A Guide to Vaccines

Vaccine Effectiveness

People are encouraged to get the vaccine for the following reasons:

- All COVID-19 vaccines currently available in the United States are effective at preventing COVID-19 as seen in clinical trial settings.
- The vaccines are the best path forward to ending the pandemic
- COVID-19 vaccination helps protect people from getting sick or severely ill with COVID-19 and might also help protect people around them.
- The vaccines have minimal side effects. The most common side effects include soreness at the injection site, fever, or body aches

Eligibility

All Marylanders 12 and older are eligible for vaccination.

Where to get Vaccinated

Vaccinations are available through hospitals, local health departments, pharmacies (including CVS, Safeway, and Walgreens), and mass vaccination sites. The State of Maryland has created a website that allows you to find a vaccination site. This information can be found [HERE](#).
